## **Inconsistency between TSCA and PA PCB Beneficial Use Permit and Clean Fill Policy**

Pennsylvania's Beneficial Use General Permit and Clean Fill Policy allow the use of PCB-containing materials that exceed the TSCA PCB Use Authorization level of 2 ppm, resulting in violations by PCB generators and Pennsylvania permittees. Currently, the Commonwealth's Beneficial Use permit allows materials containing up to 484 ppm of PCBs to be used as construction material and their Clean Fill Policy allows materials containing up to 78 ppm of PCBs to be used in an unregulated manner. The Region has been working closely with Commonwealth on this issue for a number of months and this week formally requested that Pennsylvania revise both the Beneficial Use permit and Clean Fill Policy to comply with the TSCA PCB regulated level of less than 2 ppm. Additionally, we are asking the Commonwealth to formally advise permit holders that the materials they are handling may be subject to TSCA. EPA continues to engage the state to find a resolution that adequately protects human health and the environment and provides regulatory certainty to the regulated community.
